FICTIONAL EXAMPLE — RWI-pharma Implementation Guide

Clinical Trial Protocol WD-201 (Synopsis)

Version 1.0 · 15 August 2026

Title	A Phase 2, randomised, double-blind, placebo-controlled study of WonderDrug 50 mg tablets in adults with chronic migraine (WD-201)
Objectives	Primary: change from baseline in monthly migraine days at week 12. Secondary: responder rate (at least 50% reduction), safety and tolerability.
Design	Randomised, double-blind, placebo-controlled, parallel-group
Population	Adults 18–65 with chronic migraine for at least 12 months
Treatment	WonderDrug 50 mg or placebo, orally once daily for 12 weeks
Safety monitoring	Adverse events at every visit; liver function tests at screening, week 4, week 8 and week 12
Sample size	240 participants (120 per arm), 90% power to detect a 2-day difference
Duration	12-week treatment plus 4-week follow-up
